Providing PRTF level of intensity in the community

Emily Bradshaw, MSW

University of Maryland School of Social Work
The Institute for Innovation & Implementation

Portland State University

UW Medicine
School of Medicine

Consider	Explore	Practice
Participants will consider what it means to provide a PRTF level of Intensity.	Participants will explore what services and resources they need to consider when planning with a Child and Family Team.	Participants will practice developing a plan that provides a comprehensive array of services and supports to meet a higher level of care need.

The Worst Home Beats the Best Placement

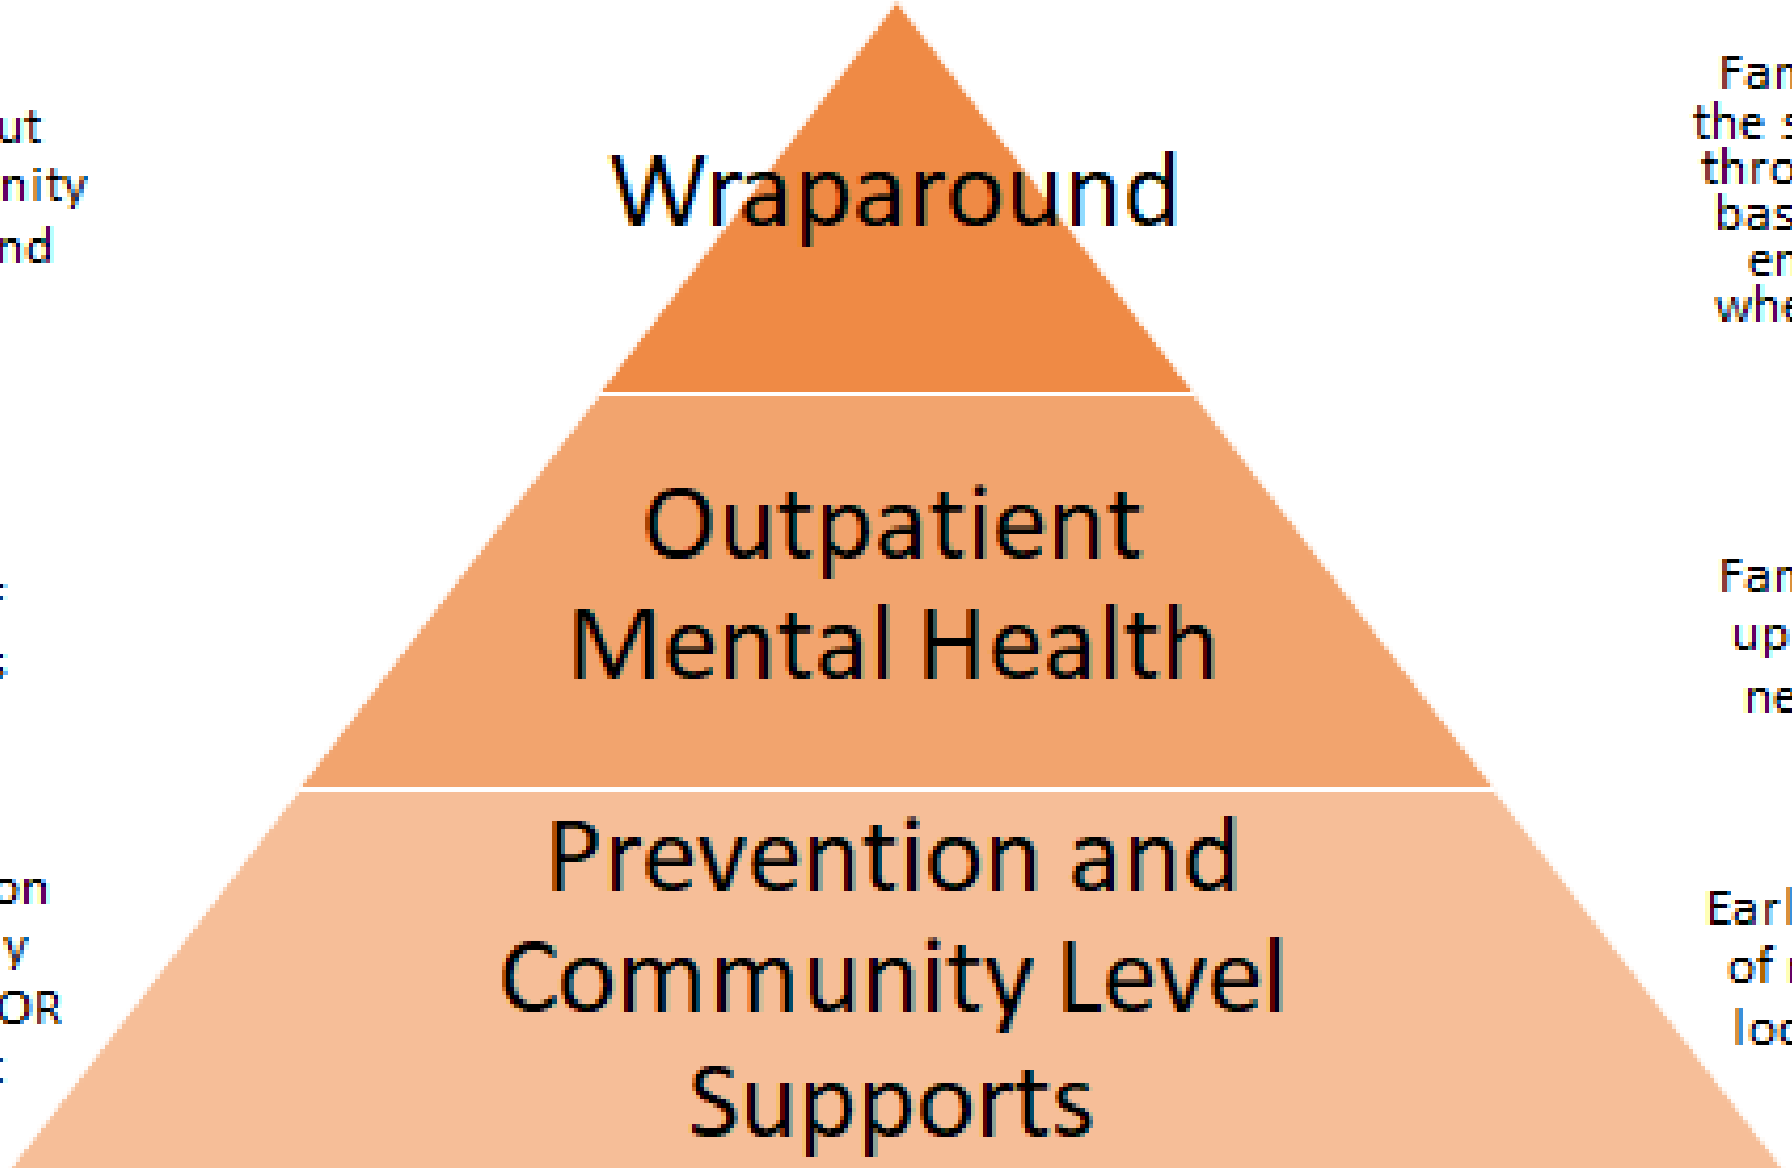
Pathways to Care

ongregate Care Pathway

Youth going out ithout community nvolvement and support

Minimal use of ormal services

ly identification need as family ks for options OR ystem contact



Wraparound Pathway

Families known to the system continue through community based options and end up in Wrap when nothing else works

Families often fail up the system as needs go unmet

Early identification of need as family looks for options

What does a youth receive when they enter a Residential Placement?

Residential Best Practices

- Trauma Informed Lens
- Connection to Home and Community Based Services and Supports
- Strength Based
- Moving toward "No Eject, No Reject"
- Match youth to best intervention to meet their needs
- Family and Youth Choice
- Individualized Planning
- Coordination across Programs and Systems
- Committed to Health Equity
- Commitment to Natural Helping Networks
- Resiliency Oriented
- Maintaining and supporting family connections

The Worst Home
Beats the
Best Placement

Give families what they need in the time they need it
